Professional Experience

Full stack Developer

March 2022 - Present

For: Unblur

IRIS CORE

Led the migration of a complex software for emergency services from AngularJS to Angular 13, ensuring seamless transition and enhanced performance.
Developed new features using Angular, .NET, MySQL, and Azure, leveraging these technologies to enhance scalability, performance, and maintainability.
Leveraged GIS (Geographic Information System) technology to enhance spatial analysis and visualization capabilities within the IRIS Core software.
Implemented a robust Single Sign-On (SSO) system, including server setup and configuration
Utilized Angular, .NET, MySQL, and Azure to build a reliable and scalable platform for coordinating and sharing critical information in UK's public and private safety sector.
Conducted thorough testing and debugging to identify and resolve issues, ensuring the reliability and stability of the software.
Actively participated in code reviews, providing valuable feedback and guidance to maintain code quality and promote collaborative development practices.
Applied agile methodologies to drive iterative development, facilitate rapid prototyping, and deliver high-quality software within project timelines.
Collaborated closely with cross-functional teams to gather requirements, design solutions, and ensure adherence to best practices throughout the development lifecycle.

Full stack Developer - Freelance

July 2020 - February 2022

For: BB for Investors
